Speaker: Tim Rowe

### **Integrated Web Application Server**

Want to start running Web applications, but your system is too small? Creating and Administrating a Web server to complicated and confusing? Dealing with the maintenance too time consuming? Concerned that ASF Tomcat is being withdrawn from service? The IBM Integrated Web Application Server for i is for you.

The integrated Web application server integrates a Web-servlet container into IBM i operating system. This Web container includes the basics for getting Servlet and JSP applications up and running quickly and effectively on the Web. The integrated Web application server is a great place to prototype new applications or to run existing small-footprint or low-use applications. You can consider the integrated Web application server as an entry point to the Web.

Administration is easy and straight forward using the IBM Web Administration for i graphical user interface (GUI). Since this Web container is part of the operating system, there are no additional products to install and maintenance is handled via IBM i PTFs. Learn how this 'i' friendly Web container can quickly and easily get you started on the road to the Web.

Learning Objectives: The user will be able to successfully create an application server for deploying their own applications or an ISV application.

### **About the Speaker:**

Tim Rowe has been working with IBM for 19+ years within the IBM i family in Rochester, Minnesota. He spent many years working on the Work Management portion of the operating system before moving into Web based middle ware on IBM i eight years ago. He is currently a Senior Software Engineer with technical leadership responsibilities for integrating Web based middle ware into the IBM i operating system. These responsibilities include the IBM HTTP Server, Web Administration GUI interface, Integrated Web Application Server for i, and Web Service Server for i. He is also a COMMON Subject Matter Expert for Web applications..

### **From the President:**

Dear i Colleagues:

We are very excited to have Tim Rowe from IBM Rochester presenting in May and June. On Wednesday May 27th you'll be introduced to the Integrated Application Server for i and in June we'll be introduced to the IBM i integrated Web services server for RPG. We have not previously had presentations on the integrated application server and both presentations will be provided in a webinar format. You'll be able to join in either at the designated meeting location or remotely. The Web Services Application Server is included in IBM i for supporting Web applications and on the Web services Wizards contained in the server.

This month we will again be giving away a registration to MITEC 2009. The one day conference event that will be held on Tuesday June 2nd 2009. The event is a power packed day of education. We are very excited to have included within the day of education:

**Linda Cole** and **Claus Weiss** from Toronto labs covering Rdi SOA, EGL, RTCi, Rational portfolio.

**Debbie Saugen** presenting disaster recovery, backup recovery and BRMS.

**Paul Tuohy** presenting RPG and much more.

**Charlie Massoglia** presenting RPG and SQL

**Larry Bolhuis** presenting navigator, V6R1 top 10 gotchas, System i access for windows, managing system i PTFs

**Paul Holm** presenting on AJAX, dashboards and mashups with Db2 and building system i web applications the 7 key considerations.

**Mike Pavalak** and **Larry Farmer** from MSU presenting PHP

Several IBM speakers with presentations on AIX and VIOS, providing a great opportunity for the i community to get a glimpse.

**...and much more.**

If you haven't already registered be sure to register for the one day event. Visit the conference web site at [www.gomitec.com](http://www.gomitec.com) for more details. The conference early bird and additional discount rate has been extended to make the event more affordable for everyone to attend.

As a reminder user group elections will be held in June. If you are interested in running for the board or would like to be more involved with user group activities contact any of the current board members. You will find contact information on SEMIUG site officers tab.

We look forward to seeing you at the May meeting and at MITEC Tuesday June 2nd 2009.

Regards,  
Laura

## **Officer Elections:**

In June we will be holding our annual officer elections.

The main function of the officers is to plan the meetings. Some offices also have other specific duties: President/VP (chairing all meetings), treasurer (handling the group's finances) and secretary (newsletters, mailing lists, web site, etc). Usually, each officer handles two meetings a year and spends just a couple of hours in total time as they call to secure a meeting location and speaker.

During the summer, the officers will meet to discuss what topics to include in the next year. Each officer will then select meetings they wish to plan. Care is taken to work around each individual's schedule and areas of interest. No one should leave the planning meeting feeling unnecessarily burdened. Often, by the end of planning session the officers have an idea of who they will be contacting for their meeting. Lists of available speakers come from COMMON, IBM, and our own business contacts. Meeting places range from IBM's meeting rooms to local library and civic centers.

In ideal circumstances a couple of phone calls and emails and everything is done....some times, it takes a few more calls just to coordinate everyone's schedules.

Isn't it time you supported the group by running for office?

Please send a message to Paul Thieme or Laura Ubelhor if you wish to be included on the ballot.
