Please join the [meeting](#) at 6:00 PM Eastern Daylight Time.

Use your microphone and speakers (VoIP) - a headset is recommended. Or, call in using your telephone.

Dial +1 (408) 650-3131

Access Code: 372-994-726

Audio PIN: Shown after joining the meeting

Meeting ID: 372-994-726

Service-Oriented Architecture is arguably the most important concept in current computer applications.

This presentation will describe the important concepts, how it differs from more traditional IBM i applications, what it means to program design, and some of the tools available on IBM i that can be used to expose service-oriented interfaces.

About the Presenter

Rich is a Senior Technical Staff Member in the IBM Lab Services Power Delivery Practice for IBM i. His specialties include application modernization, cryptography, application communication, and unusual requests. He has been working at IBM Rochester for a third of a century and in Lab Services for the last couple of decades.

Note:

MCPress SOA books will be made available for attendees in return for a contribution toward the student game activity. You may pick up a book if you attend onsite or if you are joining in remotely a book can be sent to you providing shipping costs are covered. Contact Laura Ubelhor at 248-701-7410 or ubelhor@sbcglobal.net for inquiries.

SOA for the Business Developer

List price \$39.95

Authors: Ben Margolis, Joseph Sharpe

Publication Date: June 2007

Subject: Computer: Programming & Software Engineering

Number of Pages: 330

From the President:

Dear Members:

SOA - Service-Oriented Architecture is a one of the important concepts in current business applications. We are fortunate to have Rich Diedrich from IBM Lab services presenting on the topic of SOA for our October user group meeting.

Are you already using SOA? Do you understand what SOA is and how you can make use of the concept to create modern applications? Either way, this meeting is sure to provide insight and understanding that can be applied and used to make a positive difference within your environment.

You'll be able to join in onsite at Eaton Corporation in Southfield. This is a new location for user group meetings, conveniently located in Southeast Michigan. Thanks to Doug Rezanka for making arrangements. We look forward to seeing you onsite. If you're not able to make it to the meeting onsite you'll be able to join in remotely in webinar format. We will also have MCPress SOA books available in exchange for a contribution for the student game activity. See meeting information for details.

The student game activity is well under way. We have 12 students busily working on game code on our groups iDevcloud IBM i box. The finished games will be unveiled and judged during our November meeting. You'll be able to join in onsite or remotely in webinar format. Students competing will be featured on our group site and during the meeting. It will be exciting to see student finished games. Not many rules other than the code must be completed using tools on IBM i. Prizes will be awarded to students based on placement of winning applications. Thank you to group members that have contributed providing cash prizes that will be awarded for students to use toward school expenses. Also, thank you to members that have stepped forward and signed up to assist students.

We look forward to seeing you at the upcoming SOA meeting.

Happy Halloween!

Regards,

Laura
