1099 Lone Pine Road
Bloomfield Hills, MI 48302-2410
S.E. corner of Lone Pine and Telegraph Road ([map](#))
- Speaker:** Wayne Bowers
- Notes:** Please join the [IBM Meeting](#), Tuesday, June 16, 2015 at 6:00 PM Eastern Daylight Time. Non-IBMers sign on as 'guest'. Password: power0616
Phone Access: 888-426-6840 Participant Passcode: 41569277

Mobile access is the new frontier. With much, if not most, internet access coming from mobile devices, we need to address the needs of that part of the IBM population. From the [ITJungle article](#):

A big part of the IBM i reputation is its easy access to its file system, to printers and printer output, the operating system security, and DB2 database. The interfaces and the terminology make sense to anyone familiar with the platform. The IBM i Access software family includes products that access client solutions, Windows, Linux, and Web. And now it includes mobile, as part of the Access for Web products, or it will when it becomes generally available at the end of the month.

"Access for Web was repurposed for mobile users," Tim Rowe, IBM's business architect for application development, says. "We now have a mobile interface for managing things like active sessions, printer output, job logs, spool files, message queues, operator messages, and the database."

Session Information

Managing your IBM i systems and providing user access from any mobile devices, cell phones and tablets, are becoming a business requirement. To address these needs, IBM announced the Technology Preview of the IBM i Mobile Access Solution. This session introduces the solution and explains how to obtain and deploy it.

About the Presenter:

Wayne Bowers has been with IBM since 1997, where he works with the IBM i Global Support Center in Rochester MN. He is an Advisory Software Engineer specializing in the support of the IBM i Access (aka Client Access) products, Integrated Blade server solutions, and the TCP Telnet communications server. Wayne has been developing and delivering presentations on IBM i Access products since 1999, and at COMMON since 2009.

From the President:

Dear Members:

We're excited to have "Mobile Access to IBM i" presented by Wayne Bowers, Advisory Software Engineer, from IBM Rochester.

Access for Web has been updated to provide Mobile Access. Now you will be able to access your IBM i through a mobile application that runs natively on IBM i. From your mobile device you'll be able to work with active sessions, work with printer output, job logs, spool files, system operator messages, message queues and the DB2 database.

Join us Tuesday night on site at the Bloomfield Hills library or remotely in webinar format.

This is sure to be a great tool that will help greatly with system support. No need to lug the laptop around to monitor your system? It will be exciting to hear what will be provided and how to attain the tool.

It's that time of year again we will hold elections during Tuesday's meeting. We will have members vote immediately following the meeting. There's still time to run for the board. It doesn't take much time commitment and makes a big difference. If you are interested you can contact Amanda Walsh at awalsh@consultechservicesinc.com.

A special thanks to the 2014/2015 board. We had a wonderful SEMIUG year and were able to bring great current topics and presentations to local (and some remote) local i colleagues. Our student game activity was a great success. We were also added some new meeting locations to our mix thanks to member organizations stepping forward to allow SEMIUG to hold meetings and thanks to members helping align facilities.

Thank you Vice President **Jim Thompson**, Secretary **Amanda Walsh**, Treasurer **Charles Nalbandian**, Directors; **Joy Chen**, **Gelita Maxwell**, **Doug Rezanka** and **Andy Davison** and webmaster **Dale Thieme**.

MITEC 2015 was a great success. The preconference workshops were well attended with great feedback so we will include them again next year. The conference was well attended and the day was packed full, starting with the opening session with Steve Will, vendor expo, student

meet and greet, over 50 sessions to choose from. Rdi and SQL were the big draws this year. We had 15 students at the event. The students helped and also added a great positive buzz at the event. We have been asked to include HTML 5, CSS and JavaScript at MITEC 2016. If there are topics/presentations that you would like to see included you may contact Laura at lubelhor@consultechservicesinc.com

Please put your thinking cap on. During the June meeting we will also ask members for feedback on topics that you would like to see included within the 2015/2016 SEMIUG calendar. Be prepared to share your thoughts and feedback.

See you Tuesday!

Regards,

Laura
