Leveraging Db2 Web Query to Simplify Security Compliance and Systems Utilization Monitoring

Date: Tuesday, June 26, 2018
Time: 5:30 (Deli snack) - 6:00 (Meeting)
Location: Cooper Standard
2110 Executive Hills Court
Auburn Hills, Michigan, 48326 (map)
Use the front entrance.
Speaker: Doug Mack
Presentation: [Simplify Security](#)

Overview:

Db2 Web Query is a Business Intelligence product for IBM i that simplifies data analysis for business people making business decisions, modernizes Query/400, and provides powerful data driven analysis. What's in it for the Systems Administrator? With IBM's Db2 Web Query based security solution, you could easily monitor over 1000 security attributes across your LPARs/servers and report on exceptions to compliance policy. With the evolving delivery in IBM i of "System Services" it becomes quite easy to build dashboards or reports over various things a Systems Administrator likes to track - like work management, PTFs, journaling and system limits - and this session will show you how you do that!

About the Presenter: Doug Mack is a DB2 for i Analytics Consultant in IBM's Power Systems Lab Services organization, employed by IBM in the United States.

Doug currently leads the Analytics team for the DB2 for i Lab Services team delivering Query/400 modernization, DB2 Web Query, Data Warehouse design, skills transfer, and implementation guidance services worldwide.

Doug is a regular speaker at customer events including COMMON, IBM Technical Conferences and Executive Briefings, and has written many articles and white papers on the attributes of DB2 for i for analytics.

You can follow Doug on Twitter @mckdrmoly or via his blog at [db2webqueryi@blogspot.com](http://db2webqueryi.blogspot.com)
